Visiting Etiquette

Your visit to the hospital can have a dramatic effect on a patient’s well-being. As a visitor, your support and compassion are very important to a patient’s recovery. It is also important to allow patients to rest so that they may heal. To make the visit beneficial, we suggest:

• Have no more than two visitors at a time.
• Carry on a cheerful conversation in a soft voice. Don’t expect the patient to do a lot of talking.
• Plan on spending just a short time visiting. Although the visit is almost always welcome, it can be very tiring for the patient.
• If a patient is in consultation or in need of treatment, please step out of the room.
• If you are feeling unwell or have even a slight cough or sneeze, please do not jeopardize the patient’s health by visiting. Consider a phone call or rescheduling your visit.
• When visiting, please do not sit on the patient’s bed.
• If the patient you are visiting is sharing a room, please be mindful of the other patient’s privacy and need for quiet.
• If you wish to bring balloons, only Mylar balloons are permitted. Latex balloons are not allowed in the hospital because of patient and staff allergies.
• We encourage you to check with the nursing staff before sending or bringing flowers. Flower delivery is restricted in intensive care units.
• For your safety and the safety of others, if your patient is in isolation, you must adhere to the isolation protocol. Please see the nurse for instructions.

Telephones – Patient telephones are provided free of charge. To make any outside call you must dial the area code + phone number.
